

Quick Spherz® Passive Retro-Reflective Markers

Passive Reflective Markers For Wireless Tracking

IZI Medical Products Quick Spherz® is a new product that will save you setup time while giving you the same level of accuracy as you have today. Spherz® have played an integral role in image-guided procedures performed worldwide. Our proven track record positions IZI as a market leader that can provide you and your team the technical superiority you expect from a respected device manufacturer, as well as the peace of mind your patients and their families deserve.

Quick Spherz® are used with Brainlab® image-guided surgery (IGS) systems and other IGS systems using threaded posts.*

Product Benefits
